

## How to sign a PDF complying with PAdES B-LTA level

Code in this example shows how to time stamp a signed PDF (such as a PDF signed as shown by the "Sign PAdES B-LT" sample) so that the signature complies with the PAdES baseline signature standard level B-LTA (like B-LT, but adds a document time stamp).

Note that the document shown by this sample (this PDF) is NOT actually signed or time stamped, the code time stamping the PDF is included but is not called when this demo runs online.

To time stamp a PDF so that the signed PDF complies with PAdES B-LTA level, download this sample project, in the sample code replace the "JohnDoe.pfx" file/password with the file/password of a valid certificate and set the onlineDemo variable to false, then run the sample and check the result produced by the Do\_B\_LTA() method.
