

## How to sign a PDF complying with PAdES B-T level

Code in this example shows how to sign a PDF so that the signature complies with the PAdES baseline signature standard level B-T (like B-B but includes a timestamp).

Note that the document shown by this sample (this PDF) is NOT actually signed, the code creating the signature is included but is not called when this demo runs online.

To sign a PDF so that the signature complies with PAdES B-T level, download this sample project, in the sample code replace the "JohnDoe.pfx" file/password with the file/password of a valid certificate and set the onlineDemo variable to false, then run the sample and check the result produced by the Do\_B\_T() method.
